

ABSTRACT

The present invention provides an agent for ameliorating low vasopressin level, which comprises, as an active ingredient, a substance capable of inhibiting the binding between parathyroid hormone-related peptide (PTHrP) and a receptor thereof; and an agent for ameliorating a symptom caused by a decrease in vasopressin level, which comprises, as an active ingredient, a substance capable of inhibiting the binding between parathyroid hormone-related peptide (PTHrP) and a receptor thereof.
